

POUSSOU® THERMO EXPERT ©

THE FOOTPRINT REVISED AND CORRECTED

AFTER MORE THAN 30 YEARS OF EXPERIENCE

EXCELLENCE

- Easier: HANDS-FREE function thanks to the delayed start of the vacuum
- Innovative: electronic management of the vacuum
- Practical: ideal dimensions
- 2 colors of cushions to choose from
- Patented technique

CONCEPTION ALAIN POUSSOU® & FABRICATION AMCUBE

With POUSSOU ThermoExpert, use both hands to refine your molding. Thanks to the delayed vacuum start, you can hold the foot with both hands in the chosen position. The 2 electronic vacuum management modes allow you to mold thin or thick materials while respecting the anatomy of the foot: elimination of frontal and sagittal compressions with materials over 3 mm thick. The extra-soft silicone pockets without lateral reinforcements have been designed to guarantee greater precision. The POUSSOU Thermoexpert footprint is equipped with a device for absorbing counter pressure on the ground.
